

## FUTURE TEACHERS STUDY WAR WORK, 2,000 IN CLASSES

Students at Columbia Start  
Learning Things Necessary  
at Home and at Front.

"Woman's Work in War" might well designate the course of instruction inaugurated to-day at Teachers' College of Columbia University for the last two weeks of the year's term.

## Stop Corn Pain in Two Minutes By the Clock—Easy and Simple

THE MAGIC TOUCH OF ICE-MINT DOES IT. JUST A TOUCH STOPS THE SORENESS. THEN THE CORN OR CALLOUS SHRIVELS AND LIFTS OFF. TRY IT. YOUR FEET WILL FEEL COOL AND FINE.

Thanks to a new discovery made from a Japanese product your foot troubles can be quickly ended. Ice-Mint, as this new preparation is called, is said to shrivel up hard corns, soft corns or corns between the toes, so that they can be lifted off easily with the fingers.

Ice-Mint is a clean, creamy, snow-white, non-poisonous substance, and does not inflame or even irritate the most tender skin. There is no pain, smarting, or even a bit of soreness, while applying Ice-Mint or afterward. It sets so gently so quickly, that you will never want to run the risk of blood poisoning by cutting a corn again.

—Adv.

for practically everything that woman can do at home while the men are at the front is in the curriculum. The statement has been made that the services of six persons are required to keep one on the firing line, and according to Secretary Upton of Teachers' College, this new course was established to instruct the six.

More than 2,000 of the regular students registered in Teachers' College reported this morning for the classes, which are divided into forenoon and afternoon sessions, and it is expected by the authorities that when the two weeks have ended every one of these 2,000 will be well equipped to undertake some phase of the task of "those who remain behind."

The courses cover a field which extends from bacteriological training to the training of an old hat into a new one; from knitting socks to the mechanism of an automobile; from

massage to "camouflage," which is the science of painting things in a way as to disguise them, as, for instance, the gray of warships and the shadows dashed on heavy guns at the front.

Not all of the instruction, however, has to do with those who are left at home. There are classes for the organization of social service in military concentration camps, which, in a word, consists in learning how to amuse the soldiers.

"We want people to know how to make the soldier forget for a time the man he's been shooting at, or the man who has shot at him," Mr. Upton explained. "We want to be able to interest the fighting man when he's away from the firing line, just as we want the lot of the prisoner to be somewhat happier for the service that can be given to him."

The problem of food, its preparation along economic lines, the utilization of the nutritive values of peas, beans and the like, in place of the well known portershouse, for instance, the use of such things as might in less belligerent days be thrown away, the analysis of milk and water for germs, the proper preservation of foods for use another day—these are a few of the courses. Men, too, are to be taught to emerge the courage to pass the portals of the more or less feminine institution. This course is designed especially for soldiers to be army cooks and boy scout leaders.

In one great room in the college half a hundred young women were learning to-day how to make the Red Cross garments so much in demand in the hospitals in Europe, flannel pajamas, surgical shirts, nightgowns and dressing gowns. These have been standardized in pattern, and in the course of two weeks it is expected that hundreds of them will be turned out and sent to the hospitals abroad.

In another room just as many young women were busy with great balls of worsted yarn, knitting socks, jackets, wristlets and caps for the wounded and convalescent, with a knitting professor there to show the

standard stitch and give the standard dimensions. As it has been found that massage is of great value in restoring the wounded, making stiff joints pliable, rubbing motion back to atrophied muscles, a course in scientific rubbing was also begun to-day, the students practicing upon one another under a skilled eye.

Making of plaster of Paris moulds, cutting of splints and preparation of surgical bandages claimed another large squad of students and instruction in photography for hospital and field work was also imparted to a large class. Nearly was a class learning how to make kitchen utensils out of the cans and how to make lanterns, candlesticks, hot water bottles and camp stoves with inexpensive equipment.

In the medico-surgical branch, a class was being taught the fundamentals of the Carrel-Dakin method of treating wounds and the new system of bacillus count which determines the proper time for closing wounds.

In the laundry laboratory a hundred interested young women were learning how to wash clothes properly, how to economize on soap and starch and how to remove spots from fabrics. An adjoining room held a class being taught how to make clothes over into serviceable "new" ones, and in the millinery laboratory a score of students were busy over old hats that were to be made to bloom as the roses.

"This comes under the head of economy," Mr. Upton explained, "and if war time isn't the time to learn it, when is?"

Great attention is being given to the care of children. It is assumed that with men in the ranks, the women will have to take care of the winners, and the care of the children will then fall upon visiting nurses and others capable of caring for the little ones in the mother's absence. In this course is included all instruction in the making of children's clothing.

## STRIKERS IN NEW YORK LOSE 9,581,163 DAYS' PAY

253,954 Workers Involved in 328 Walkouts During a Nine-Month Period.

ALBANY, May 14.—In the last nine months of the last fiscal year there were in this State 328 strikes among 253,954 employees, who lost 9,581,163 days' wages and caused 31,629 other workers to lose 1,466,725 days.

Five of the strikes were because of unsatisfactory working conditions, thirteen for shorter hours, twenty-six for union recognition and 270 for increase of wages. One strike was sympathetic. None was due to any decrease of wages.

Of the 328 strikes, 129 succeeded, 169 were lost and the rest partly succeeded. The State Bureau of Mediation intervened in ninety-six, settling fifty-four. Eighty-five strikes were in the metal and machine trades, seventy-six in transportation, thirty-eight in the building industry, twenty-seven in the textile trades, eighteen in stone, clay and glass products and sixteen in clothing and millinery industries.

## POST OFFICE EARNINGS BIG.

The New York Post Office took in \$3,617,549 in 1916, according to figures compiled by the Chamber of Commerce. This was an increase of \$3,500,000 over the receipts in 1915. The net profit to the Government was \$2,938,812, or 65 per cent.

The New York Post Office is now taking in more than 16 per cent of the entire United States postal revenues, which totaled \$32,657,888 for the fiscal year ended June 30, 1916.

## POSAM MEETS EVERY DEMAND WHEN SKIN AILS

You will find in Poslam the quick relief you seek for ailing skin, the active help you need to be rid of Pimples, to heal Eczema, to drive away Rash, Redness and to clear inflamed Complexions.

When Poslam is applied, angry skin is pleasantly cooled, irritation is allayed. Itching, however intense is ended. Nothing but a healing power rare and unusual could accomplish such complete and satisfying work. That is what Poslam possesses in the highest degree.

Sold everywhere. For FREE SAMPLE write to: ECKMAN LABORATORIES, 243-5 West 41st Street, New York.—Adv.

FOR SALE BY LUGGETT'S RIKER-HIGHMAN STORES AND OTHER LEADING DRUGGISTS.

## CABINET MEMBERS CALLED BY LAMAR; SENATOR ON STAND

Subpoena in Plot Trial Mystery to Him, Daniels and Gregory, Says Norris.

David Lamar to-day resumed the witness chair in the Federal Court when trial of the cases against him, Franz von Rintelen and five others, charged with conspiracy, was resumed before Judge Cushman. It was revealed during the day that two members of President Wilson's Cabinet are among the witnesses summoned in Lamar's behalf.

Lamar wished to continue his story, which on Saturday involved a dozen well known persons in the financial and political world, but Judge Cushman ruled that this was ancient history and not relevant to the case. The Court insisted that Lamar having testified an arrangement had been made between him and the Rev. Dr. Thomas C. Hall, formerly with the Union Theological Seminary, but now in Germany, the witness must divulge that plan before he could go on with the story of his life.

Finally Lamar said the plan was very large in scope and included among other things:

"The spreading of a propaganda to show to the people the crookedness of the big trusts.

"The spending of huge amounts of money in the Legislatures of fifteen States.

"Showing the people the forgeries and false statements in the books of the New York, New Haven & Hartford Companies and its subsidiaries, as disclosed by testimony."

Then, running through a list of railroad and other industrial corporations, the defendant named the Rock Island, Pere Marquette, Baltimore & Ohio, "Steel Trust," "Money Trust," "Tobacco Trust," and a dozen others, the alleged iniquities of which he was asked, he said, to bring to the attention of the public.

"The real purpose," finally summarized the witness, "was to stop the private manufacture of munitions of war."

United States Senator George W. Norris of Nebraska appeared in court to-day in answer to a subpoena from Lamar. The latter's counsel said he had given subpoenas to a dozen Senators, Secretary of the Navy Daniels, Attorney General Gregory and other public officials.

"Neither I nor these others know what it is all about," said Senator Norris.

It was indicated that Judge Cushman would permit the calling of these officials. It was even hinted that the Pujio Committee's acts might be reviewed in the case.

Senator Norris, taking the stand, said he had no recollection of ever meeting Lamar until he saw him in court. William H. Green, Senator Lane and others were mentioned in inquiries as to whom the Senator talked with before he introduced a bill to investigate the rebates of the Steel Trust and he acknowledged that these conferences might have been due, in part, to Lamar's efforts.

The Senator spoke well of ex-Congressmen Fowler and Buchanan, two of the defendants.

Lamar resumed the stand after Senator Norris was excused and described a conversation he alleged took place between President Wilson and one of the defendants, Henry H. Martin, then prominent in the Anti-Trust League. The conversation occurred soon after the nomination of Mr. Wilson, he said, and he quoted him as saying to Martin:

"If I am elected I shall see to it that the people know that I am going to prosecute the Steel Trust to the limit. This is a gigantic combination, the gravest of all dangers in this country. The Pujio Committee showed this, and I shall force legislation to take up the matter."

The witness told of his part in bringing together Lewis Cass Lydard and Edward Lauterbach by impersonating, on the telephone, Congressman A. Mitchell Palmer.

## TO PLAN BRIDGE OR TUNNELS

Gov. Edge to Appoint a New Commission Without Delay.

Gov. Edge of New Jersey said yesterday he would appoint without delay a Hudson River Bridge and Tunnel Commission of three members each from Essex, Hudson and Bergen Counties and one member at large. It will succeed the present commission.

The commission will locate and draw plans for Hudson River tunnels or bridge, subject to the approval of the Federal Government and the State of New Jersey, and the approval of three Justices of the Supreme Court. Public hearings will be held.

Two Syracuse Priests Die.

SYRACUSE, May 14.—Two of the most prominent priests in the Catholic diocese of Syracuse died at about the same hour yesterday. The Rev. Thomas R. Flynn of Canastota dropped dead on the stage of Canastota Opera House when he was about to speak at a patriotic exercise, and the Rev. Michael Resler, pastor of St. Ignace German Church in Rome, N. Y., expired at his residence here.

## OBITUARY NOTES.

Henan L. Waterbury, seventy-two, telegraph operator who died in Syracuse, N. Y., died in New York City, N. Y., after a long illness.

Mrs. Alice Maud Fitch, mother of the late Clyde Fitch, the playwright, died at No. 113 East Fortieth Street.

James B. Shaw, fifty-three, former President of the Kings County Republican Club, is dead at No. 925 Greene Avenue, Brooklyn.

Daniel R. Hays, capitalist and former member of the Hartford trolley system, is dead in Hartford, Conn.

Miss Cornelia Beekman, a direct descendant of William Beekman, who came to America in 1649, is dead in Oyster Bay.

## ON TRIAL FOR GIRL'S DEATH.

Scientific Analysis Figures Largely in Case Against Two Accused Men. Testimony of ecologists will play an important part in the trial of Giuseppe Matteolone, fruit vendor, put on trial to-day for his life before Supreme Court Justice Biassell for the murder of eleven-year-old Fille Brown at No. 134 Monroe Street, Oct. 3 last.

Matteolone and his partner, Vincenzo De Stefano, had a stand in front of the house where the girl was found dead. Police Commissioner Wood called in Dr. Otto H. Klein and his assistants of the Standard Testing Laboratory, who made chemical analysis of the various articles found in the collar when the child's body was discovered. Much of the prosecution's case is based on the results they found.

## ARM CUT OFF BY TRUCK.

Patrick Morrissey Fell Under Wheel of Heavy Motor.

Patients of Bellevue Hospital this morning witnessed a two-ton motor truck owned by Headlinton & Woods, brewers of No. 221 West Tenth Street, heavily loaded, run over Patrick Morrissey, fifty-six years old, a laborer of No. 224 East Forty-sixth Street, at Twenty-sixth Street and First Avenue. Morrissey's left arm was cut off. He was crossing the street when he slipped beneath the rear wheels. He was carried into the hospital.

Well Known G. A. R. Man Dies.

SARATOGA, N. Y., May 14.—Oliver P. Clarke, custodian of Grant Memorial Cottage, maintained by the State at Mount McGregor, and Vice Assistant Adjutant of the State organization of the Grand Army of the Republic, died to-day aged seventy-four years. He was widely known in Grand Army circles.

## Doctor Says Nuxated Iron Will Increase Strength of Delicate People in Ten Days

In many instances—Persons have suffered untold agony for years doctoring for nervous weakness, stomach, liver or kidney disease or some other ailment, when their real trouble was lack of iron in the blood.—How to tell.

In a recent discourse Dr. E. Sauer, a Boston physician who has studied widely both in this country and in great European medical institutions said: "If you were to make an actual blood test on all people who are ill you would probably be greatly astonished at the exceedingly large number who lack iron and who are ill for no other reason than the lack of iron. The moment iron is supplied all their multitude of dangerous symptoms disappear. Without iron the blood at once loses the power to change food into living tissue and therefore nothing you eat does you any good; you don't get the strength out of it. Your food merely passes through your system like corn through a mill with the rollers so wide apart that the mill can't grind. As a result of this continuous blood and nerve starvation, people become generally weak, nervous and all run down and frayed. They develop all sorts of conditions. It is too thin, another is burdened with unhealthy fat, some are so weak they can hardly walk, some think they have dyspepsia, kidney or liver trouble; some can't sleep at night, others are sleepy and tired all day; some are fussy and irritable, some skinnier and bloodless, but all lack physical power and endurance. In such cases, the moment iron is supplied to take stimulating medicines or narcotic drugs, which only whip up your fraying vital powers for the moment, may be at the expense of your life later on. No matter what any one tells you, if you are not strong and well you owe it to yourself to make the following test. See how long you can

work or how far you can walk without becoming tired. Next take two five-grain tablets of ordinary Nuxated Iron three times per day, after meals, for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous, run-down people, who were ailing all the time, double and even triple their strength and endurance and entirely get rid of their symptoms of dyspepsia, liver and other troubles in from ten to fourteen days' time, simply by taking iron in the proper form, and this, after they had in some cases been doctoring for months without obtaining any benefit. You can talk as you please about all the wonders wrought by new remedies, but when you come down to hard facts there is nothing like good old iron to put color in your cheeks and good sound, healthy flesh on your bones. It is also a great nerve and stomach strengthener, and the best blood builder in the world. The only trouble with the old forms of inorganic iron, like tincture of iron, iron acetate, etc., often ruined people's teeth, upset their stomachs and were not assimilated, and for these reasons they frequently did more harm than good. But with the discovery of the newer forms of organic iron all this has been overcome. Nuxated Iron, for example, is pleasant to take, does not injure the teeth and is almost immediately beneficial.
